

Ai Interview Coach – Overview Document

Company Name	Ai Interview Coach
Document Title	AI Interview Platform – Brief Overview
Version	1.0

1. Introduction

Ai Interview Coach is an AI-powered interview platform that helps companies conduct faster, smarter, and more scalable hiring. The system automates interview scheduling, question delivery, candidate evaluation, and reporting using advanced AI models.

2. Problem Statement

Hiring is slow and expensive because manual interviews take time, screening is inconsistent, and shortlisting requires repetitive evaluation. Many companies also struggle to manage high-volume applications efficiently.

3. Our Solution

An AI Interview System that provides automated interview rounds, structured role-based questions, AI-based candidate scoring, interview recordings, and detailed candidate reports for HR and hiring managers.

4. Key Features

- AI Interview Bot (Voice / Video / Text)
- Question Bank (Role & Skill Based)
- Automatic Candidate Evaluation
- Audio & Video Analysis (confidence, clarity, speech speed, keywords)
- Skill Score + Final Recommendation
- Dashboard for HR and Admin Panel

5. How It Works

- 1) HR creates job and selects skills
- 2) Candidate receives an interview link
- 3) AI conducts the interview and records responses
- 4) AI generates score and report
- 5) HR reviews and shortlists candidates

6. Target Users

- Startups hiring at scale
- HR agencies
- Mid-size companies
- Campus placement teams
- Recruitment platforms

7. Benefits

- Saves time and cost
- Faster hiring decisions
- Standardized evaluation
- Reduces interviewer workload
- Scales to thousands of candidates

8. Future Scope

- AI proctoring and fraud detection
- Multi-language interviews
- Custom company interview templates
- Integration with ATS platforms
- AI-based personality and communication insights
